Key Elements

Siting Analysis
Phase I ESA
Alternative Evaluation
Site Characterization Work Plan
Site Characterization Field Work
Site Characterization Report
Quarterly Groundwater Monitoring
Location Standards Documentation
Engineering Design Report & Calculations
Permit Level Design Drawings
Environmental Monitoring Plan
Closure & Post Closure Plan
CQA Plan
Operations Manual

Solid Waste Services

ECS is serving as prime consultant via our sister company, Solid Waste Professionals of Wyoming, LLC (SWPW). We were contracted by Grasslands Environmental to provide comprehensive permitting and design activities for a new Greenfield industrial landfill near Bill, WY. SWPW, along with their sub consultant, Golder & Associates, will be responsible for preparing permit documents, preparing permit level engineering design drawings, and conducting subsurface investigations in support of the expansion. Project work commenced in November 2013, with plans for a permit application to be submitted to WDEQ by April 2014. ECS staff are working closely with WDEQ Staff during the early phases of the project to ensure a complete permit
